

ALL TOGETHER: CAMPAIGN PROJECTS TIMELINE

Carnegie Museums has a bold vision for the future, one that will reshape how visitors engage with each of its four museums for decades. Below is a timeline of projects that will be funded through the ALL TOGETHER campaign, listed by completion date or estimated year of completion. From creating new visitor experiences to reimagining our museum grounds to building a new creative arts space on the North Shore, there are plenty of opportunities to support the growth of Pittsburgh's most essential cultural institution.

Mars: The Next Giant Leap

This experience at Kamin Science Center transports visitors to a settlement on the red planet, providing a glimpse into how future residents might live and the challenges they'd face in that waterless and inhospitable world.

Reimagined Permanent Galleries

The ongoing reimagining of Carnegie Museum of Art's Scaife Galleries (with an estimated completion in 2030) leverages new art histories and points of engagement, repositioning the collection as an even more relevant 21st-century resource.

Sports 360

The largest-ever exhibition to open inside Kamin Science Center builds on the passion for sports ingrained in Pittsburgh's psyche with interactive experiences that explain the science behind some of our favorite sports.

Egypt on the Nile

Carnegie Museum of Natural History will unveil its much-anticipated immersive exhibition that explores the interdependence of natural and human history through ancient Egypt's relationship with the Nile.

Rotating Exhibition Space

Located in the former Walton Hall of Egypt, this gallery on Carnegie Museum of Natural History's third floor will unite art and science, attracting new and diverse audiences.

COURTESY OF FUTUREFORMS, 2025

Peirce Atrium Installation

This four-story interactive art installation called CELESTIA will fill Kamin Science Center's Peirce Atrium with light, movement, and imagination.

Little Learners Clubhouse

A refreshed version of this beloved space at Kamin Science Center will continue to serve early learners in the community.

Science Park

A transformation of Kamin Science Center's North Lot will offer a relaxing green space with free outdoor science-based experiences, bicycle parking, and other neighborhood amenities.

The Factory: Creative Arts Center

The flagship campus development of The Warhol's Pop District initiative, a new creative arts center will open across General Robinson Street to host interdisciplinary performing arts and exhibitions.

Natural Wonder

A multisensory exhibition at Carnegie Museum of Natural History for early learners and their adults will foster curiosity and exploration around the natural world.

The Pop District

The Warhol's \$60 million initiative to transform a five-block area on Pittsburgh's North Shore included the creation of Pop Park, a new silkscreening Print Lounge, and a workforce development program offering a diploma in digital marketing and paid fellowships. Still to come is The Factory: Creative Arts Center.

Carnegie Music Hall Renovation

Carnegie Music Hall's largest renovation since it opened in 1895 preserved the historic beauty of the hall while introducing critical updates such as new wiring, modern air conditioning, and improved accessibility.

Science of Speed

This dynamic exhibition at Kamin Science Center will explore the symbiotic relationship between auto racing and science, complete with electronic go-karts.

Building Futures

The all-new exhibition at Kamin Science Center will feature interactive activities designed to inform and inspire young visitors, transforming how they view career opportunities in the trades.

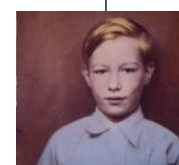

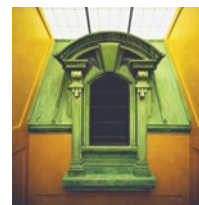

Photovoltaic Canopy

A large solar array outside Kamin Science Center will generate clean energy, reduce CO2 emissions and the urban heat island effect, and provide shelter for vehicles and pedestrians.

Heinz Architectural Center Refresh

A redesign of Carnegie Museum of Art's Heinz Architectural Center will refresh the visitor experience with exciting contemporary experiences and events.

Andy Warhol's 100th Birthday

The Andy Warhol Museum is already gearing up to celebrate Andy Warhol's centennial with an August 2028 birthday bash and much more.

Reimagined Dinosaur Hall

Carnegie Museum of Natural History's beloved historic hall will be refreshed for the first time in two decades.

Other Future Projects

Steel Beach

The Science Center's riverfront transformation will embrace ecological restoration and create opportunities for education, recreation, and leisure.

Scaife Lobby Refresh

Planned renovations to the main artery of the Oakland museums will prioritize openness and mobility, creating space for the community to gather.

Welcome Experience

A refreshed entry in the Museum of Natural History's current Benedum Hall will transform visitors' first impressions and deepen connections to our geologic heritage.

Revitalized Grounds in Oakland

Carnegie Museum of Art intends to open spaces and create pedestrian gathering sites that combine accessible works of art with sustainable natural beauty.
